

DEMIRS Approvals Performance Reporting (Mining and Petroleum) March Quarter 2024

The Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) is committed to transparency in its approval performance, which helps drive continuous improvement and assists industry planning.

We continue to see high demand for approvals across resource tenure, petroleum activities and native vegetation clearing.

A range of initiatives are underway to continuously improve approval timeframes, some of which are planned to take effect in late 2024. These include the delivery of the [DEMIRS Eligible Mining Activity and Mining Development and Closure Proposals](#) frameworks as well as the [Resources Online](#) digital transformation program.

Andrew Chaplyn

Deputy Director General

Resource and Environmental Regulation Group

Performance summary

Key highlights and changes for the percentage of applications finalised within target timelines for the December 2023 to March 2024 quarters include:

- mineral tenure approval performance ranged from 94 to 98 per cent depending on the tenure type;
- programmes of work decreased from 84 to 51 per cent;
- petroleum well activities increased from 93 to 100 per cent;
- petroleum tenure decreased from 100 to 76 per cent; and
- native vegetation clearing permits increased 60 to 72 per cent.

The average total timeline is the time taken in the assessment process by DEMIRS, the proponent and where applicable, other government agencies. Other agency input may be required for complex applications, particularly if access is required to culturally important or environmentally sensitive areas.

The DEMIRS performance objective is to finalise 80 per cent of applications within the target timeline. Departmental performance is measured against a range of administrative and statutory targets. For example, the DEMIRS target for finalising a mineral exploration programme of work application is 15 business days (BD). The “speedo” dashboard graphics used in this report represent performance against each approval type for the quarter.

The segment titled parallel processing shows the number of overlap days where an application was on hold for both the proponent and another agency.

Most mineral and petroleum tenure applications are subject to the requirements of the Commonwealth *Native Title Act 1993*. These applications include a four-month notification period (around 80 business days) prescribed under S29 of this Act. This period is included as part of the “Other agencies” component for mineral and petroleum tenure applications.

To further explain the above, refer to the Exploration License section (page 4). The average total timeline to finalise an Exploration License application is 290 business days (approx. 14 months). This consists of DEMIRS processing time (37 days), proponent time (26 days) and other agencies (212 days). There were 15 days of parallel processing. Ninety six per cent of Exploration Licence applications were finalised within the target for DEMIRS processing time of 65 business days. Native Title Act 1993 requirements represent the majority of this timeline (approx. 10 months).

This report provides detailed information about the number of received, finalised and open applications.

Mining Act 1978 – Mineral tenure applications

Prospecting Licence

Average **301** days total

% Finalised within target timeline

- DEMIRS

Appendix – DEMIRS target timeline information

Key approval processes	Target timeline (business days)
Mining Tenure	65
Petroleum Tenure	120
Petroleum Environment Plan	21
Mining Proposal	30
Programme of Works	15
Radiation Management Plan	30
Well Activities	21
Native Vegetation Clearing Permit	60

Note: Petroleum Environment Plans and Well Activities have a statutory target of 30 calendar days (21 business days).
